Dear Parent/Guardian:

I again would like to thank you for your patience as we make arrangements to meet the needs of students during this emergency closure. This letter is to inform you of the expectations of your student while they are out of the building.

It is our goal to provide all middle and high school students with engaging learning activities that will continue the learning process. It is our hope that these activities will decrease the interruption to instruction and continue student's progress towards meeting graduation requirements.

While learning activities will vary by course and grade level, they may include websites, videos, discussion boards, video conferences, recorded lectures, independent work activities, or other methods in order to engage your child. Activities are being prepared for a 30-day closure. Keep in mind that some instructors will be providing activities to last the duration of the closure, while others may be offering weekly activities via email, google classroom, or other modes of communication.

All instructors have been asked to reach out to their students and encourage participation in the activities as well as offer assistance where needed. They will be in communication with students and engaging in the learning process on a daily basis.

If you run into issues, have questions or concerns, or simply are in need of any additional support, please do not hesitate to contact myself via email at dcook@pancent.org or via phone at (716)782-4413. I want to thank you for your support as we work towards providing all students learning opportunities.

Sincerely,

Danielle J. Cook
Secondary Principal
